# "Convolution of an integral equation with the $\mathbf{H}$-function as its kernel" <br> Ram Niwas Meghwal <br> Department of mathematics Govt. College Sujangarh, Rajasthan (India). 

Abstract The object of this paper is to solve an integral equation of convolution form
having H-function of two variable as it's kernel. Some known results are obtained as
special cases
Keywords - integral equation, convolution, generalized type geometric function of two variables
AMS Subject classification No. 45E10

## 1. Definition and Introduction

The following definition and results will be required in this paper
(i) The Laplace Transform if

$$
F(P)=L[f(t) ; p]=\int_{0}^{\infty} e^{-p t} f(t) d t, \quad \operatorname{Re}(p)>0
$$

1.1)

Then $F(p)$ is called the Laplace transform of $f(t)$ with parameter $p$ and is represented by $\mathrm{F}(\mathrm{p})=\mathrm{f}(\mathrm{t})$ Erdelyi [(3) pp.129-131]
(ii) $L[f(t) ; p]=F(P) \quad$ then $L\left[e^{-a t} f(t)\right]=F(p+a)$
1.2)

And if $\quad f(0)=f^{\prime}(0)=f^{\prime \prime}(0)=\ldots . .=f^{m-1}(0)=0 \quad, f^{n}(t)$
Is continuous and differential, then
$L\left[f^{n}(t) ; p\right]=P^{n} F(p)$
....(1.3)
(iii) If $L\left[f_{1}(t)\right]=F_{1}(p)$ then $L\left[f_{2}(t)\right]=F_{2}(p)$

Then convolution theorem for Laplace transform is

$$
\begin{equation*}
L\left\{\int_{0}^{1} f_{1}(t) f_{2}(t-u) d u\right\}=L\left\{f_{1}(t)\right\} L\left\{f_{2}(t)\right\}=F_{1}(p) . F_{2}(p) \tag{1.4}
\end{equation*}
$$

(iv) The H-Function Defined by Saxena and kumbhat [1] is an extension of Fox's HFunction on specializing the parameters, H-Function can be reduced to almost all the known special function as well as unknown

The Fox's H-Function of one variable is defined and represented in this Paper as follows [see Srivastava et al [2],pp 11-13]

$$
\begin{align*}
& H[x]=H_{P, Q}^{M, N}\left[x / I_{\left(b_{j}, \beta_{j}\right)_{1, Q}}^{\left(a_{j}, \alpha_{j}\right)_{1, P}}\right]=\frac{1}{2 \pi \omega} \int_{\theta=N-1} \theta(\xi) x^{\xi} d \xi \\
& \theta(\xi)=\frac{\prod_{i=1}^{n} \Gamma b_{j}-\beta_{j} \xi \prod_{j=1}^{N} \Gamma 1-a_{j}-\alpha_{j} \xi}{\prod_{i=M=1}^{Q} \Gamma 1-b_{j}+\beta_{j} \xi \prod_{j=N+1}^{P} \Gamma a_{j}-\alpha_{j} \xi} \\
& \text { For condition of the } \mathrm{H} \text { - }
\end{align*}
$$

Function of one variable (1.5) and on the contour $L$ we refer to srivastava et al [2] (V) The H-Function of two variable occurring in this paper is defined and represented as follows [see Srivastava et al [2] ,pp 83-85]

$$
H[x, y]=H_{p_{1}, q_{1}, p_{2}, q_{2}, p_{3}, q_{3}}^{0, n_{3}, m_{2}, n_{2}, m_{3}, n_{3}}\left[x_{y} / \begin{array}{lll}
\left(a_{j}, \alpha_{j}, A_{j}\right)_{1, p_{1}} & \left(c_{j}, z_{j}\right)_{1, p_{2}} & \left(e_{j}, E_{j}\right)_{1, p_{3}} \\
\left(b_{j}, \beta_{j}, b_{j}\right)_{1, q_{1}} & \left(d_{j}, \delta_{j}\right)_{1, q_{2}} & \left(f_{j}, F_{j}\right)_{1, q_{3}}
\end{array}\right]
$$

$$
\begin{align*}
=- & \frac{1}{4 \pi^{2}} \int_{L_{1}} \int_{L_{2}} \phi_{1}(\xi, \eta) \psi_{2}(\xi) \psi_{3}(\eta) x(\xi) y(\eta) d \xi d \eta \quad \text { Where } \\
& \phi_{1}(\xi, \eta)=\prod_{j=1}^{n_{1}} \Gamma\left(1-a_{j}+\alpha_{j} \xi+A_{j} \eta\right) \\
& \times\left[\prod_{j=n_{1}+1}^{p_{1}} \Gamma a_{j}-\alpha_{j} \xi-A_{j} \eta \prod_{j=1}^{q_{1}} \Gamma 1-b_{j}-\beta_{j} \xi+B_{j} \eta\right]
\end{align*}
$$

Where the $\psi_{2}(\xi)$ and $\psi_{3}(\eta)$ are defined as (1.6) and for conditions of existence etc. of the $H(x, y)$ we refer to srivastava et al [2]

## 2. Main Result

Result I $L\left\{t^{\alpha} H_{P, Q}^{M, N}\left[a t^{\alpha} f_{\left(b_{j}, \beta_{j}\right)_{1, Q}}^{\left(a_{j}, \alpha_{j}\right)_{1, P}}\right], P\right\}$

$$
=P^{-1-\alpha} \boldsymbol{H}_{P+1, Q}^{M, N+1}\left[a t^{-\lambda} / \begin{array}{rr}
(-\alpha, \lambda)\left(a_{j}, \alpha_{j}\right)_{1, P} \\
\left(b_{j}, \beta_{j}\right)_{1, Q}
\end{array}\right]
$$

Provided $\operatorname{Re}(p)>01 \geq \lambda>a$ and $\operatorname{Re}(1+\alpha)>0$

## Result II

$$
\begin{aligned}
& \int_{0}^{1}\left\{x^{\alpha-1}(1-x)^{\beta-1} H_{P_{1}, Q_{1}}^{M_{1}, N_{1}}\left[z_{1} x^{\lambda} I_{\left(b_{j}, \beta_{j}\right)_{1, Q_{1}}}^{\left(a_{j}, \alpha_{j}\right)_{1, P_{1}}}\right] H_{P_{2}, Q_{2}}^{M_{2}, N_{2}}\left[z_{2}(1-x)^{\mu} I_{\left(d_{j}, \delta_{j}\right)_{1, Q_{2}}}^{\left(c_{j}, \gamma_{2}\right)_{1, P_{2}}}\right]\right\} d x
\end{aligned}
$$

Provided $\operatorname{Re}(\alpha)>0 \operatorname{Re}(\beta)>0 \quad \lambda, \mu>0$

$$
\operatorname{Re}\left(\alpha+\lambda \frac{b_{j}}{\beta_{j}}\right)>0 \operatorname{Re}\left(\boldsymbol{\beta}+\mu \frac{d_{j}}{\delta_{j}}\right) \quad>0 \quad \mathrm{j}=1,2 \ldots . \mathrm{m} \mathrm{k}=1,2 \ldots . \mathrm{g}
$$

$$
\begin{aligned}
& \left|\arg z_{1}\right|<\frac{1}{2} \pi \Delta_{1} \quad\left|\arg z_{2}\right|<\frac{1}{2} \pi \Delta_{2} \quad \Delta_{1} \Delta_{2}>0 \\
& \Delta_{1}=\sum_{1}^{M_{1}} b_{j}-\sum_{M_{1}+1}^{Q_{1}} b_{j}+\sum_{1}^{N_{1}} a_{j}-\sum_{N_{1}+1}^{P_{1}} a_{j} \\
& \Delta_{2}=\sum_{1}^{M_{2}} d_{j}-\sum_{M_{2}+1}^{Q_{2}} d_{j}+\sum_{1}^{N_{2}} c_{j}-\sum_{N_{2}+1}^{P_{2}} c_{j}
\end{aligned}
$$

## Result III

$$
\begin{aligned}
& L\left\{e^{-n t} \boldsymbol{t}^{h} \boldsymbol{H}_{P, Q}^{M, N}\left[z t^{k} /_{\left(b_{j}, \beta_{j}\right)_{1, Q}}^{\left(a_{j}, \alpha_{j}\right)_{1, P}}\right], \boldsymbol{P}\right\} \\
= & (P+a)^{-1-h} H_{P+1, Q}^{M, N+1}\left[z(p+a)^{-k} /\right.
\end{aligned}
$$

Provided $\operatorname{Re}(p)>01 \geq \lambda>a$ and $\operatorname{Re}(1+\infty)>0$
Proof I First Taking by mellin barnes type contour integral for H - function for one variable and then convolution of laplace transform for H -function and get required result.
Proof II Taking by mellin barnes type contour integral for H - function for two variables and then using beta function we get required result.
Proof III same as proof I

## 3. Conclusion

From this Paper we get some many solution of integral equation of convolution from having H - Function of one or more veriables

## 4. Acknowledgement

The author is highly grateful to Dr. Atul Garg for their valuable help and suggestions to improve this paper
